Q & A Discussion

UMIC Gold, An initiative by
'Project Station' with the help of
'INNOVIX SOLUTIONS' on the
concept of "LEDIA"

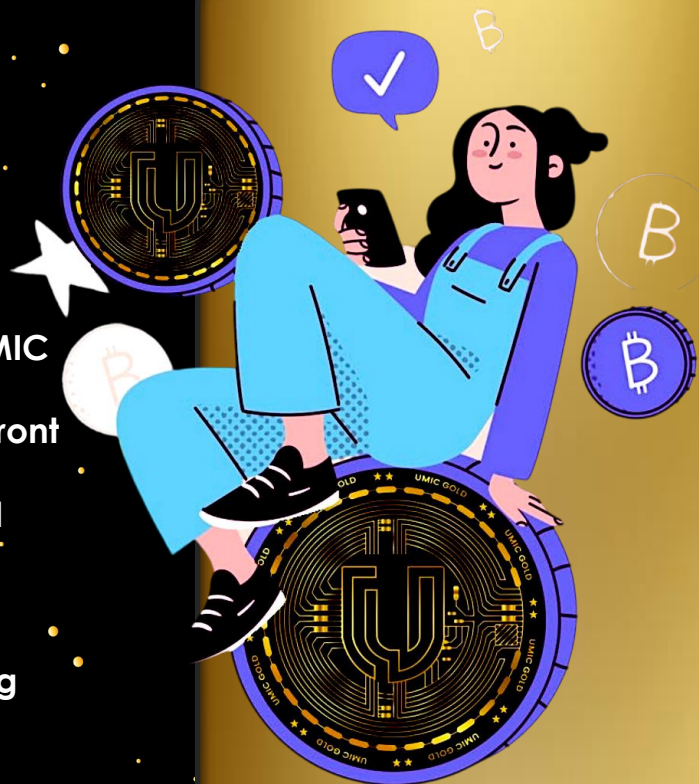

History of Crypto Currency

Journey

Cryptocurrency has come a long way since its inception, revolutionizing the way we think about money and finance. UMiC Gold, a groundbreaking cryptocurrency project, is at the forefront of this digital revolution, ushering in a new era of decentralized finance. In this project, we'll journey from the birth of cryptocurrency to the innovative world of UMiC Gold, exploring how it's shaping the future of digital finance.

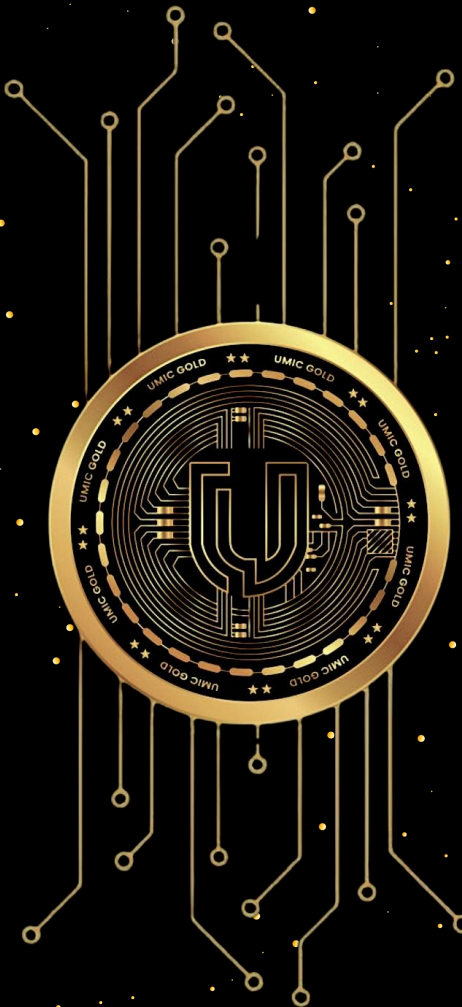

Introduction to Bitcoin (BTC)

Bitcoin, often referred to as digital gold, introduced a revolutionary technology called blockchain, which underpins all cryptocurrencies.

Blockchain is a decentralized and immutable ledger that records transactions across a distributed network of computers.

This technology allows for trust less and transparent transactions, eliminating the need for intermediaries like banks.

Evolution of Cryptocurrency

Bitcoin was just the beginning. Over the years, thousands of cryptocurrencies have emerged, each with its unique features and use cases. Ethereum, created by Vitalik Buterin in 2015, introduced smart contracts, enabling programmable, self-executing agreements.

This innovation paved the way for a plethora of decentralized applications (dApps) and the rise of decentralized finance (DeFi).

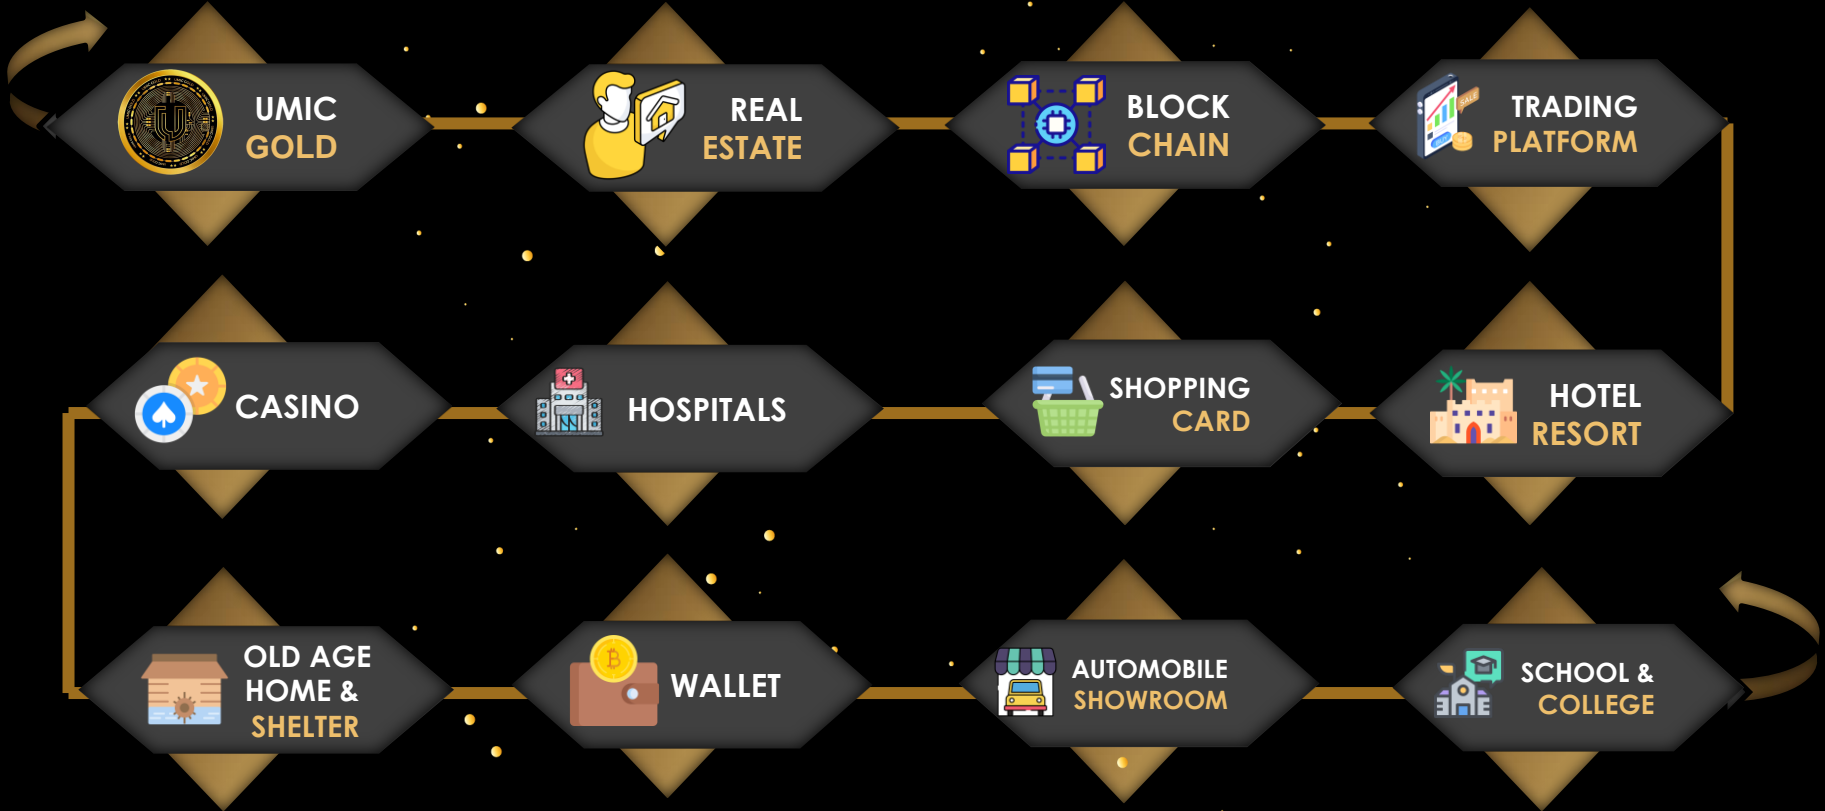

Adoption

Cryptocurrency adoption has grown beyond speculative trading, with real-world applications in remittances, cross-border payments, and even as a hedge against economic instability. Governments and financial institutions are also exploring blockchain technology for various purposes, from central bank digital currencies (CBDCs) to supply chain management.

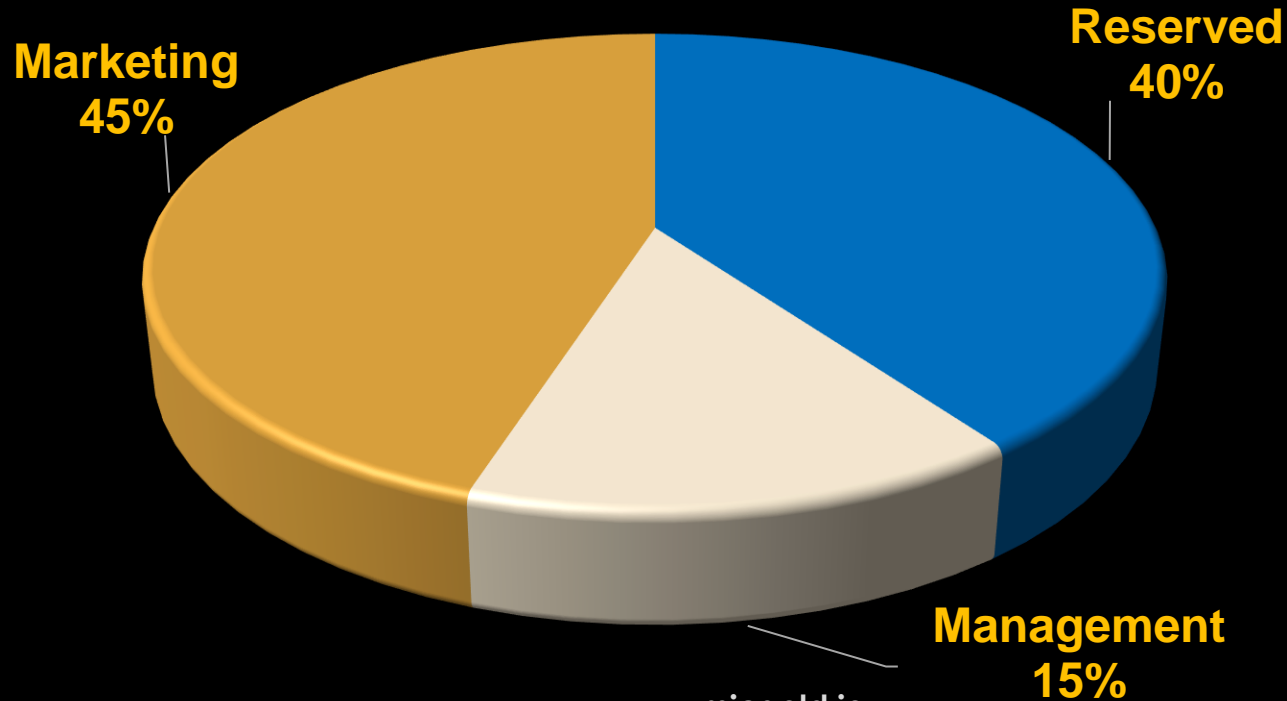

Coin Details

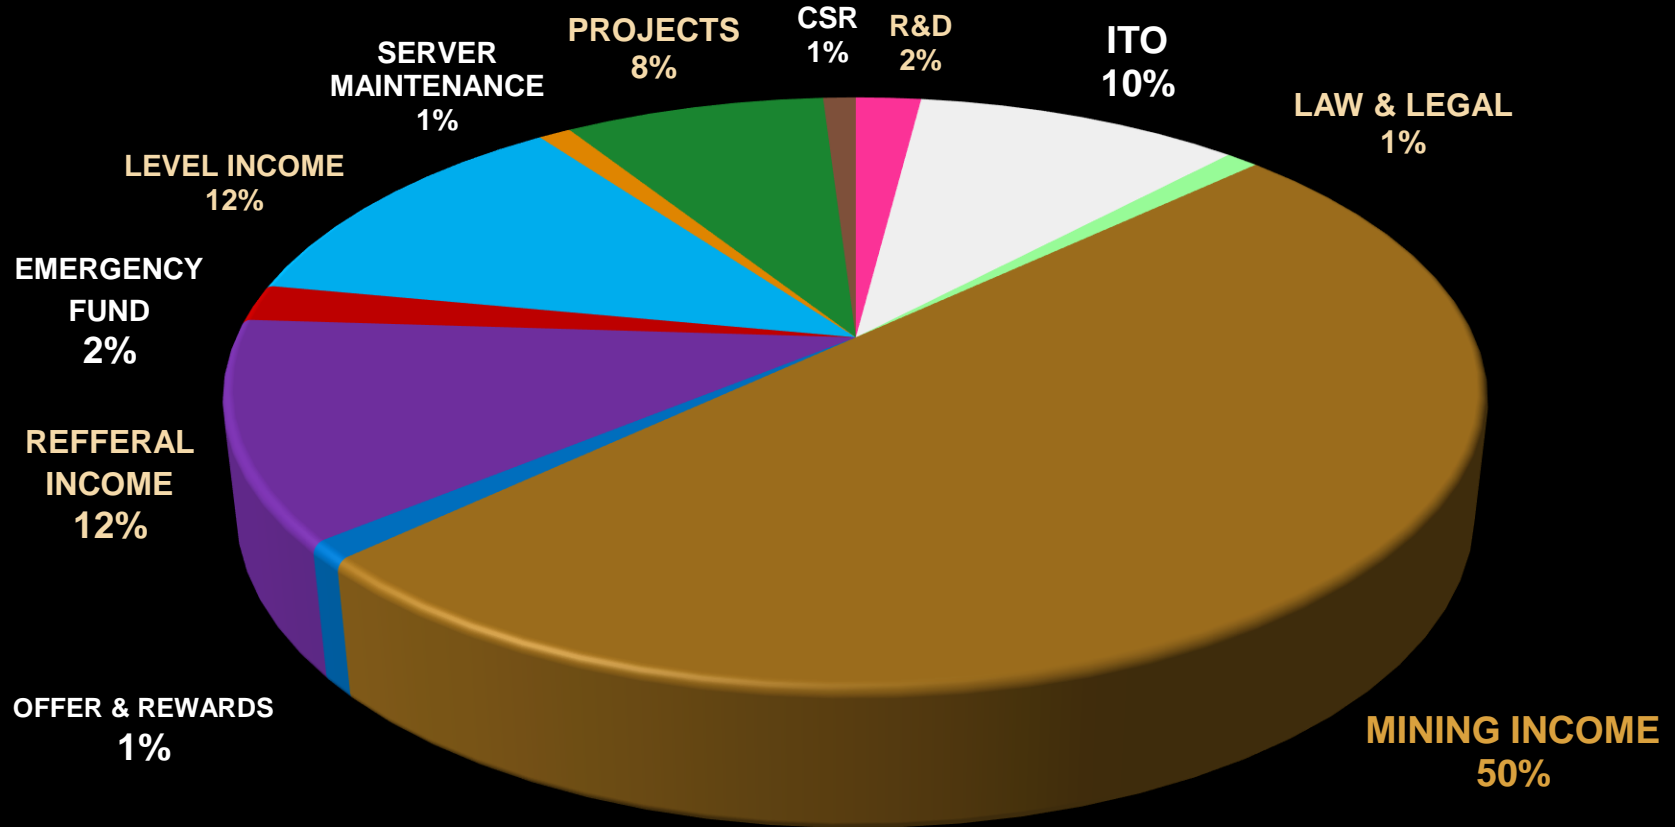

Coin Name : UMiC GOLD
Short Name : UMIG
Coin Pair : UMIG/USDT
Network : BEP – 20
Blockchain : Binance (BSC)
Decimal : 11 (Crore)

TOTAL SUPPLY = 11,00,00,000

MARKETING SUPPLY = 6,60,00,000

Journey of UMIC Gold

What is UMiC Gold ?

UMiC Gold is a
revolutionary
cryptocurrency
developed on Binance
Smart Chain (BSC)
focused on sustainable
mining.

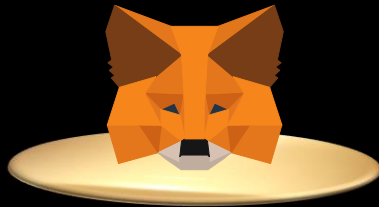

UMiC Gold empowers
participants to earn
through mining, staking,
referrals, and by many
more program.

UMiC Gold mechanism
work on robust
blockchain with
cutting-edge technology.

Supported Wallet

UMIC Gold participants can access UMIC Gold on world's best decentralized wallet like Metamask, Trust Wallet or Token Pocket for Staking, Transfer, Hold and all types of transactions.
